

DEEP PAIRA

Full-Stack Developer

Bhubaneswar, Odisha | 8927746507 | deeppaira45@gmail.com | linkedin.com/in/deep-paira | github.com/Deep-paira

SUMMARY

Full-stack developer building modern, scalable, high-performance web applications with React, Next.js, Tailwind CSS, Framer Motion, and Django. Strong foundation in HTML5, CSS3, JavaScript (ES6+), and Python, with practical experience in REST APIs, machine learning pipelines, and database-driven systems. Detail-oriented, with a focus on clean UI, smooth animation, and accessible, reliable user experiences.

EDUCATION

Institute of Technical Education and Research (ITER), SOA University

Bhubaneswar, Odisha

Bachelor of Technology in Computer Science and Engineering

Graduation year: 2028

CGPA: 8.5/10 (after 4th Semester) | Relevant Coursework: Data Structures & Algorithms, Web Development, Database Management, Machine Learning

TECHNICAL SKILLS

- **Languages:** C, Python, Java, JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React, Next.js, Tailwind CSS, Bootstrap, Framer Motion, React Router, React Hook Form, Vite
- **Backend:** Django, Node.js, FastAPI, REST APIs, Authentication & Authorization, Database Management
- **Machine Learning & Data Science:** NumPy, Pandas, Matplotlib, SciPy, Scikit-Learn (Linear Regression, Supervised Learning), CSV/Data Processing
- **3D & Creative Tech:** Three.js, Framer Motion
- **DevOps & Tools:** Docker, Git, GitHub, Figma, Canva
- **Deployment & Cloud:** Vercel, Netlify, Firebase

PROJECTS

Portfolio Website

[GitHub]

- Designed and built a personal portfolio using Next.js, Tailwind CSS, Framer Motion, and Three.js, featuring custom scroll-driven 3D animations and an interactive contact system
- Implemented a backend email pipeline using a Next.js API route and Resend for validated, spam-protected contact form submissions

MediTrack

[GitHub]

- Built a role-based district health centre management platform (React, TypeScript, Firebase) covering five staff roles, giving a real-time, district-wide view of medicine stock, bed occupancy, and doctor attendance
- Implemented live Firestore-backed alerts, inter-centre resource redistribution requests, and analytics dashboards (Recharts) with an interactive Leaflet map showing computed health scores per centre

PawPlex

[GitHub]

- Developed a role-based web dashboard (React, Vite, Tailwind CSS, Zustand) for veterinary clinics, animal shelters, and pet stores to manage appointments, adoptions, and inventory in one portal
- Built JWT-authenticated, role-protected routing and analytics views with Recharts (appointment trends, adoption trends, revenue) plus full light/dark mode support

ProofTrail

[GitHub]

- Built a verifiable skill passport and explainable internship/team-matching platform (React, FastAPI, PostgreSQL) for Smart India Hackathon 2026, with separate Student, Employer, and Institution portals
- Implemented an explainable matching engine using Sentence Transformer embeddings and cosine similarity, plus JWT/OAuth authentication and institutional skill verification workflows

ADDITIONAL COURSEWORK & PRACTICE

- Implemented core data structures (e.g. singly linked list) in Java to build a strong foundation in algorithmic problem solving (GitHub)
